Dear Customer:

As specified in the attached cover letter, the enclosed recertification form will need completion in order to continue disposal of your waste stream at our Kettleman Hills Facility.

Note that there are highlighted areas on the enclosed profile sheet which will require clarification/completion. Refer to the enclosed profile sheet guide for direction. Note that "NA" is not considered acceptable, and "none detected" needs to have analytical procedure information attached.

When updating the highlighted areas, please list that information in Section B of the recertification sheet. In addition to the information provided, please authorize in Section B, Chemical Waste Management to add this information to the original profile sheet.

Should you have any questions, please contact your sales representative or our customer service group at (714) 970-7971.

Sincerely,

Customer Service
